

Technical rider for act "Control"

by Saana Leppänen

This technical rider applies together with the contract. It has to be signed by both the organizer and the performer.

Act

Vertical rope act

Duration: 7 min

Audience: all ages

Performing space

Height: 8m (please contact me right away if the place is higher or lower)

Width: min. 5m

Deep: min. 5m

Rigging

There needs to be rigging point in the ceiling that takes 1000kg weight. I would like to rig my own rope or see how the rope is rigged. This is because of safety reasons.

To do that I will need a safe and easy way to go up in the ceiling and there should be someone showing me how to do that.

I will bring myself:

- 1 x 1m effective working length 1t industrial round sling
- 2 x carabena
- 1 x svivel
- 1 x triangular maillon (in case of a wide bridle)
- 1 x circus rope 9.5m with a breaking strength of 2.5t

Crash matt

I will expect from organizer at least size of 2.5x2.5m crash matt that can take person dropping from 7m into it.

If the crash matt is not enough safe for act "Control", I'm allowed to make changes into the act. These changes might effect to the length of the act.

If the organizer don't have crash matt, please contact me right away.

Music and lights

I will bring my sound on phone/memory stick. There should be someone putting the sound on and off during my performance.

Music piece is made by Magnus Larsson. The music piece is made only for the purpose of the performance. Any other purposes is not allowed. If you wish to use it for another purpose, contact me.

If there is possibility for performing lights:

- warm-colored lights
- main focus on rope
- starting from black and ending to blackout

Timetable (this is suggestion)

4 hours before performance I will arrive and someone should show me the place

3 hours before performance I will rig my rope

2.5 hours before performance I will warm up with the rope

2 hours before performance we will check the music and lights with the person who is responsible of them

Dressing room

I will need one clean, heated and lockable (or a safe place to leave my personal belongings) dressing room. It should be enough big for basic stretching and warm up (if not I need another room for warm up).

Should be in dressing room:

- toilet
- a mirror
- still bottled water
- fruits and nuts are preferable
